

Introducing The Finest  
American Full Spectrum  
CBD Oil. Indoor  
Grown To Exacting  
Quality Standards.

*“Indoor growing has significant advantages for all participants in the supply chain, especially the end user customer. It allows for a controlled growing environment that is free from issues that affect quality and safety such as weather, molds, aphids, heavy metals and pesticides.”*

Artesian Oils is a Division of Skyway Oil, LLC. Skyway uses a proprietary grow system, called CropTowers, developed by our parent company Hyperponic. It produces an enormous quantity and extremely high quality biomass. The closed loop, fully-integrated, controlled environment provides reliable, repeatable, identical crops, harvest after harvest.

Our computer-regulated system optimizes proprietary nutrients, water, lighting, room temperature, CO2 and many more elements to maximize consistent high quality yield at every harvest. The plants are fed precise nutrition at precisely the right time. Our automated lighting system – that starts in the clone and veg process – delivers the right spectrum and brightness for stress-free plant development.

*Artesian Oils*

ORGANICALLY GROWN AT OUR INDOOR FARM  
SMALL BATCH CRAFTED TESTED PURE & CLEAN

Available in 600 mg Lemon Citrus and Spearmint flavored tinctures. See product label for nutritional facts.

Our State Of The Art Aeroponic Grow Facility in Asheville, NC

Increasingly, consumers realize that CBD oil is a healthy, beneficial and legal product. Manufacturers and consumers are now demanding information on the origins of the oil, the lab reports and information about pesticides and other potentially dangerous ingredients. They demand higher quality oils, full spectrum oils, pure bud oils and certified American grown and processed oils.

Until now, the only way to produce high volume hemp for oil was to grow outside, but that has many risks, not only to the crop, but the quality and purity of the CBD that is produced.

Until now, the only way to grow high quality hemp for oil was to grow indoors. But the space demands made indoor growing prohibitively expensive.

**Not any more. Introducing Artesian Oils by Skyway Oil.**

Artesian Oils parent company, Skyway Oil owns the hemp grow. We do not buy from unknown sources. Ever. We use our own hemp, grown indoors under medical grade conditions, in Asheville, NC.

**Tested, Then Retested.**

When it's time for processing, each batch is analyzed internally for purity, and then we engage trusted third-party testing labs to check for toxins,

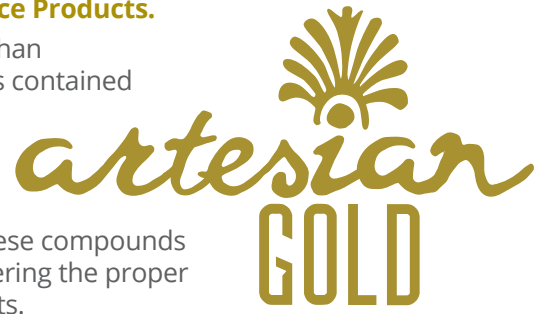

pesticides and heavy metals.

**Manufactured Under Strict Controls.**

The CBD oil is then blended and packaged in a laboratory environment, under strict controls, to deliver the purest and most-trusted products on the market. When it comes to quality, purity and product consistency of our CBD products, we meet or exceed the highest possible standards.

**High Performance Products.**

There are more than 100 cannabinoids contained within the hemp plant and proper selection, extraction and purification of these compounds is crucial to delivering the proper therapeutic effects.

Our CBD tinctures provide a vital component required by the human endocannabinoid system to aid the body in maintaining proper functioning of nerve transmission and the reduction of neuroinflammation. Our formulations are a safe, all-natural, non-intoxicating, non-habit-forming alternative to dangerous and addictive drugs.

Research has shown that the cannabinoids contained in our formulation have the significant ability to deliver powerful relief for the symptoms of arthritis, joint and muscle pain, swelling, seizures and anxiety disorders.

**Certified Hypergrown Partners.**

Artesian Oils are proud Hypergrown Certified Partners, meaning we grow and produce under clean, medical grade conditions from start to finish. The hemp is always being harvested indoors, so it is consistently fresh and free from molds, mildew and pests often found in outdoor grown hemp.
